Art Unit 2508

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-22, drawn to a semiconductor device, classified in Class 357, subclass 67.

II. Claims 23-24, drawn to process for making semiconductor devices, classified in Class 437, subclass 180.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. 806.05(f)). In the instant case unpatentability of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by processes materially different than those/that of the group II invention, for example, in claim 23, instead of performing a plating operation on the at least one layer in the upper conductor structure, sputtering and chemical vapor deposition can be used to form a metal layer on the at least one layer.

Because these inventions are distinct for the reasons given above and , as shown by the above different classifications, the

fields of search are not co-extensive and separate examination would be required, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).

Any inquiry concerning this communication should be directed to Loke at telephone number (703) 308-4920.
